# Custom Designed Solutions

## Our Technology is shaped by your Needs

With over 85 years of industry knowledge our Technical Sales Engineers can help answer any questions. If you require a unique conveyor to deliver the best conveyor performance, we will not hesitate to recommend, design and deliver a totally custom solution for your application.

**Straight Conveyors**

### Custom designed for your application

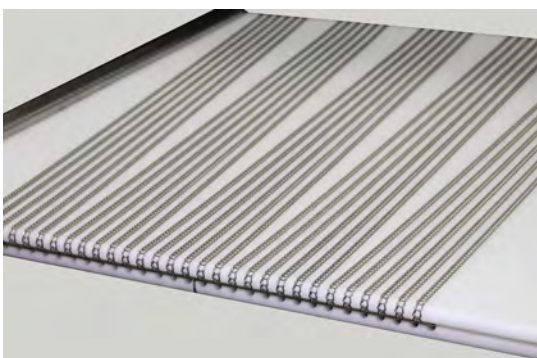

- Hygienic open structure offering access to all areas for ease of cleaning
- A wide range of optional features ensure versatility to satisfy most requirements
- Can be fitted with various options of conveyor belt to suit your needs

**Flex-Turn® Conveyors**

### The hygienic way to convey around corners

- Gentle product handling minimises product damage
- Maintains product orientation around turns
- Easy to use, clean and maintain
- Unique non collapsing tapered-pitch belt

**Ladder-Flex™ Conveyors**

### Spreading, converging and diverging

- Custom designed to accommodate your specific processing application
- Tight transfers with adjacent conveyors
- Product is fully supported across conveyor surface
- Inclining and declining options available
